

AKSHAT DIXIT

akshatd845@gmail.com — +91 70073 95488 — linkedin.com/in/akshatdixit001 — github.com/akshatd845-maker — Lucknow, India

Third-year CS undergraduate with 1+ years of full-stack engineering experience. Delivered production-grade web applications across React/Next.js frontends, Node.js/FastAPI backends, and AI/ML integrations. Proven ability to own features end-to-end — from schema design to deployment. Seeking software engineering internships in full-stack, frontend, or AI engineering.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript (ES6+), Python, Java, SQL
Frontend	React 18, Next.js, Three.js, GSAP, Tailwind CSS, HTML5/CSS3, Responsive Design
Backend & DB	Node.js, Express, FastAPI, MongoDB, SQLite, REST APIs, JWT Auth
Tooling	Git/GitHub, Docker, Vite, Vercel, Linux

EXPERIENCE

Frontend AI Engineering Intern

Present

FlyRank AI • Remote

- Building AI-powered frontend applications using React, Next.js, and TypeScript; contributed to user-facing features shipped to production.
- Designing and implementing AI-integrated UIs with a focus on performance, accessibility, and responsive user experience.
- Collaborating cross-functionally with engineering teams to architect scalable, AI-driven web application modules.

Full Stack Developer Intern

May 2026 – Jul 2026

CodeAlpha • Remote

- Built and maintained full-stack web applications using the MERN stack (MongoDB, Express.js, React, Node.js).
- Engineered RESTful APIs and JWT-based authentication systems serving data-driven application workflows.
- Improved application performance and load times through query optimization and front-end caching strategies.

PROJECTS

Future Basket – Full Stack E-Commerce Platform

MongoDB, Express.js, React, Node.js, JWT

- Architected a production-ready e-commerce platform featuring user authentication, product management, shopping cart, order processing, and an admin dashboard.
- Implemented secure JWT-based auth flow and integrated payment processing; designed normalized MongoDB schemas optimized for query performance and scalability.
- Delivered fully responsive UI with optimized database queries, supporting end-to-end order lifecycle management.

Task Flow – Project Management System

MongoDB, Express.js, React, Node.js

- Developed a collaborative project management platform supporting task assignment, real-time status tracking, deadline management, and multi-user team workflows.
- Implemented role-based access control (RBAC) and RESTful API layer; built responsive dashboards enabling streamlined project visibility across teams.

Weather Forecasting Application

React, Node.js, REST API, Tailwind CSS

- Developed a full-stack weather app with real-time API integration, geolocation-based tracking, and 10-day forecast visualizations.
- Optimized API call batching and implemented lazy loading to reduce data-fetch overhead and improve perceived performance.

EDUCATION

B.Tech — Computer Science Engineering

Shri Ramswaroop Memorial University, Lucknow

CGPA:6.5

2023 – 2027

ACHIEVEMENTS & CERTIFICATIONS

- **Smart India Hackathon (SIH)** — Built ML-powered crop yield prediction system; competed nationally as part of a 6-person team.
- Shipped 10+ independent full-stack applications spanning AI integrations, ML pipelines, 3D graphics, and real-time data processing.
- **Certifications:** Java Programming • Introduction to Artificial Intelligence • Microsoft Excel • Technology Job Simulation (Deloitte)
